Hawai‘i – Tsunami ESF-6 playbook

Data as of 2026-10-28

County: Hawai‘i · **Hazard:** Tsunami

Planning aid. Supports, does not replace, county emergency plans. Not an official shelter list.

1. Summary

Calculated by open code from public data · see Sources (section 8)

People in the risk area **12,462**	May need a public shelter (likely) **623**	May need a public shelter (low – high) **249 – 1,371**
Speak English less than well (C) **462**	Use power-dependent medical equipment (estimate) (M) **86**	People with a disability (I) **1,839**
Age 65 and older (I) **2,675**	People in households without a car (T) **864**	Hearing difficulty (C) **528**
Vision difficulty (C) **434**	Cognitive difficulty (memory, decisions) (I) **905**	Age 65 and older, living alone (S) **649**
Known 2026 shelter sites usable for this hazard **10**	People in the extreme tsunami zone (worst case) **14,008**	

Source: CDC/ATSDR Social Vulnerability Index 2022 (ACS 2018–2022 estimates), HHS emPOWER, FEMA National Risk Index v1.20; shelter rates: section 8.

Share of people in the risk area who may need a public shelter: low 2%, likely 5%, high 11%. One person can be counted in more than one need. Page 2 explains how to read these numbers.

2. Scope: county total vs. one community

The county total is an upper bound. It counts the people living inside the tsunami evacuation zone as hit at the same time. Real events usually hit fewer communities.

Largest single community (the Census areas with the most people who may need a shelter)

Community (Census area)	People in the risk area	May need a public shelter (low – likely – high)	Speak English less than well	Use power-dependent medical equipment (estimate)	People with a disability	Age 65 and older	People in households without a car
Kailua Census area 216.08	1,971	39 – **99** – 217	150	16	264	487	27
Hawaiian Paradise Park Census area 210.14	1,391	28 – **70** – 153	44	8	143	257	0
Hilo Census area 205	1,344	27 – **67** – 148	36	8	202	236	291

Source: people and needs – CDC/ATSDR Social Vulnerability Index 2022 (ACS 2018–2022 estimates), HHS emPOWER and FEMA National Risk Index v1.20; community names – 2020 Census blocks and places, spellings from USGS GNIS.

To plan for one community, use the first row.

How to read this playbook

Example row

Community (Census area)	People in the risk area	May need a public shelter (low – likely – high)
Kailua Census area 216.08	1,971	39 – **99** – 217

Read it as: about 1,971 people live in the risk area of Kailua. If this hazard hits, between 39 and 217 of them may need a public shelter; 99 is the likely number.

Census area

A neighborhood-sized area the U.S. Census uses, usually 1,200–8,000 people. The number (for example "Census area 308") is its Census ID. Each area is named after the Census place where most of its people live. "near" means no one in the area lives inside a named place; "rural near" means most people live outside named places.

Low – likely – high

The share of people in the risk area who may go to a public shelter: low 2%, likely 5%, high 11%. Where the rates come from: Team assumptions: likely 5%; low 2% (the hurricane planning factor); high 11% (the Lahaina 2023 rate).

Who has access and functional needs (CMIST)

- **C – Communication:** people who speak English less than well (they may need interpreters and translated messages), and people with hearing or vision difficulty.
- **M – Medical:** people who use power-dependent medical equipment (an estimate from HHS emPOWER).
- **I – Independence:** people with a disability, people with cognitive difficulty (memory, decisions) and people age 65 and older.
- **S – Safety and support:** people age 65 and older living alone, children and people living in group quarters (in the needs table).
- **T – Transportation:** people in households without a car.

County total vs. one community

The county total counts the people living inside the tsunami evacuation zone as hit at the same time, so it is an upper bound. Use the "Largest single community" table to plan for an event that hits one community.

Map

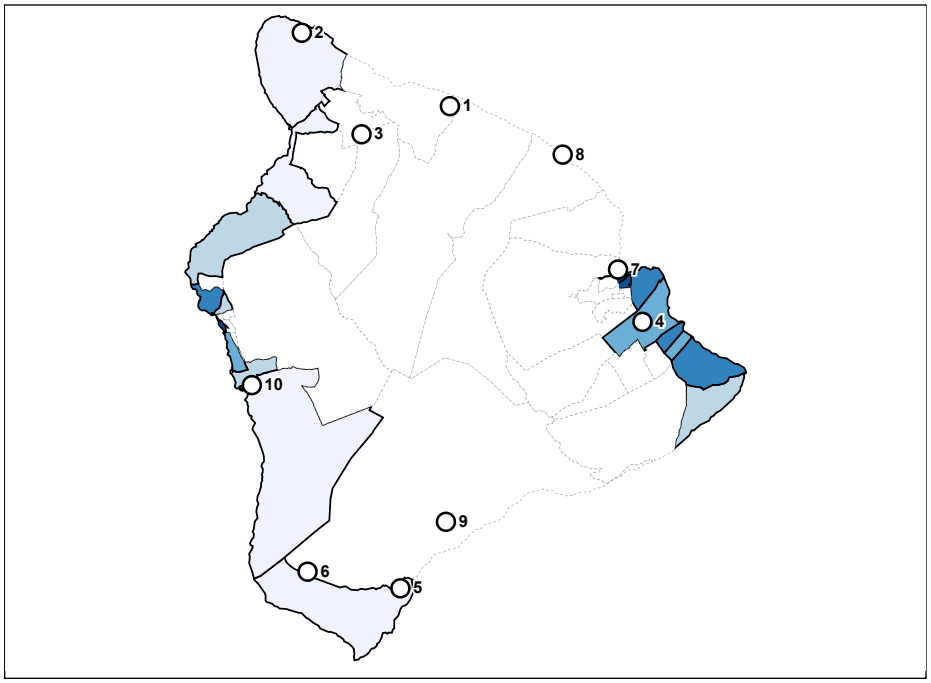

Darker blue means more people with needs, from "Lowest need" to "Highest need". A solid outline marks a Census area in the risk area; a dashed outline is outside it. Symbols: ○ usable site, △ check flood zone, ◇ flood risk not mapped, ⊠ not for this hazard. Numbers on the map match the site key.

Why population numbers can differ

People in the risk area come from ACS 2018–2022 estimates (through the CDC Social Vulnerability Index 2022). Community names use 2020 Census counts. County totals in the plan use Census estimates for 2025. Each table names its source underneath.

Every number is a planning estimate. In an event, follow county announcements.

No 2026 activated site within a 15-minute drive (normal traffic), for sites usable for tsunami: 32 of 43 populated Census areas. With DOE candidate schools usable for this hazard: 15 of 43. This is not a statement that the area has no shelter: counties designate and open shelters for each event, and many public buildings are not on the 2026 list.

Drive-time matrix, per hazard: shortest drive from the area's land point to a 2026 activated site usable for that hazard on the same island; scenario 2 adds the 5 nearest DOE candidate schools usable for it. Who else to plan for

- **Domestic-violence survivors:** Served through confidential providers; no counts by design.
- **Off-grid households:** No public Census-area data; county and health partners to supply.
- **People on dialysis or receiving home care:** No public Census-area data; county and health partners to supply.
- **Earthquake:** Not modeled; listed as a limitation in the plan.
- **Caregivers and personal care attendants:** Stay with the person they support; count them for cots, meals and space.
- **Behavioral health:** Mental-health staff at each shelter (ratio: section 8).
- **Ni‘ihau:** Privately owned island, no public shelter; plan with the landowner and Kaua‘i County.
- **Families afraid to seek shelter (including immigrant families):** The county publishes who may use shelters; trusted community messengers share it.

6. Decision points

Proposed – supports, does not replace, county plans.

When	Trigger	Action	Owner (proposed)	Support
BEFORE	Annual pre-positioning review (no official product) County (sets the date)	PRE-POSITION: confirm shelters/refuge outside the tsunami evacuation zone (and extreme zone), transport plan for no-vehicle residents inside the zone, pre-approved multilingual evacuation messages.	County Emergency Management (each county)	Hawai‘i Emergency Management Agency (HI-EMA), Hawai‘i Department of Human Services (DHS), Hawai‘i Department of Transportation (DOT)
BEFORE	Before each season: who may use shelters (no official product) County (sets the date)	County confirms and publishes who may use shelters and what ID is needed; trusted community messengers share it.	County Emergency Management (each county)	Hawai‘i Department of Human Services (DHS), Faith-based organizations, Office of Hawaiian Affairs (OHA), Hawai‘i VOAD (Voluntary Organizations Active in Disaster)
DURING	Tsunami Warning NOAA Pacific Tsunami Warning Center (PTWC)	Evacuate the zone; open refuge outside the zone; prioritize residents who cannot evacuate on their own.	County Emergency Management (each county)	Hawai‘i Emergency Management Agency (HI-EMA), Hawai‘i Department of Transportation (DOT), American Red Cross
AFTER	Warning cancelled or all clear County / NWS / PTWC	Shelter displaced households, feeding, power for medical devices, donations and volunteers.	American Red Cross	Hawai‘i VOAD (Voluntary Organizations Active in Disaster), Hawai‘i Department of Health (DOH), Utilities, The Salvation Army

- **Coverage:** 436 of 436 Census areas have needs data (FEMA risk data joined for 435 of 436). Source: coverage check of the needs layer (CDC SVI 2022, FEMA NRI v1.20).
- **Backtest – Lahaina wildfire (2023-08-11):** observed 1,418 people in shelters; model 254 / 635 / 1,423 (low / likely / high). This is a calibration event, not validation: the high rate was set from it. Source: Lahaina 2023 backtest (Maui Now count of people in shelters).
- **Time:** a full rebuild from local data (14 steps, 20 scenarios, 20 playbooks) took 77.6 seconds on Apple M4 (2026-10-28). Team-assumed baseline without this tool: 2 working days per county per event. Sources: timed full rebuild from local data; Team assumption, to be confirmed with DHS in a timed tabletop exercise.
