Maui – Coastal flooding ESF-6 playbook

Data as of 2026-10-28

County: Maui · **Hazard:** Coastal flooding

Planning aid. Supports, does not replace, county emergency plans. Not an official shelter list.

1. Summary

Calculated by open code from public data · see Sources (section 8)

People in the risk area **36,678**	May need a public shelter (likely) **1,834**	May need a public shelter (low – high) **734 – 4,035**
Speak English less than well (C) **1,041**	Use power-dependent medical equipment (estimate) (M) **237**	People with a disability (I) **4,027**
Age 65 and older (I) **7,035**	People in households without a car (T) **1,598**	Hearing difficulty (C) **1,409**
Vision difficulty (C) **724**	Cognitive difficulty (memory, decisions) (I) **2,209**	Age 65 and older, living alone (S) **1,836**
Known 2026 shelter sites usable for this hazard **6**		

Source: CDC/ATSDR Social Vulnerability Index 2022 (ACS 2018–2022 estimates), HHS emPOWER, FEMA National Risk Index v1.20; shelter rates: section 8.

Share of people in the risk area who may need a public shelter: low 2%, likely 5%, high 11%. One person can be counted in more than one need. Page 2 explains how to read these numbers.

2. Scope: county total vs. one community

The county total is an upper bound. It counts the 25% of Census areas in the county with the highest FEMA risk score for this hazard as hit at the same time. Real events usually hit fewer communities.

Largest single community (the Census areas with the most people who may need a shelter)

Community (Census area)	People in the risk area	May need a public shelter (low – likely – high)	Speak English less than well	Use power-dependent medical equipment (estimate)	People with a disability	Age 65 and older	People in households without a car
Kahului Census area 319	5,325	106 – **266** – 586	489	29	609	866	517
Kaunakakai Census area 317	4,827	97 – **241** – 531	19	35	820	1,047	237
Kīhei Census area 307.13	3,834	77 – **192** – 422	33	13	286	389	118

Source: people and needs – CDC/ATSDR Social Vulnerability Index 2022 (ACS 2018–2022 estimates), HHS emPOWER and FEMA National Risk Index v1.20; community names – 2020 Census blocks and places, spellings from USGS GNIS.

To plan for one community, use the first row.

How to read this playbook

Example row

Community (Census area)	People in the risk area	May need a public shelter (low – likely – high)
Kahului Census area 319	5,325	106 – **266** – 586

Read it as: about 5,325 people live in the risk area of Kahului. If this hazard hits, between 106 and 586 of them may need a public shelter; 266 is the likely number.

Census area

A neighborhood-sized area the U.S. Census uses, usually 1,200–8,000 people. The number (for example "Census area 308") is its Census ID. Each area is named after the Census place where most of its people live. "near" means no one in the area lives inside a named place; "rural near" means most people live outside named places.

Low – likely – high

The share of people in the risk area who may go to a public shelter: low 2%, likely 5%, high 11%. Where the rates come from: Team assumptions: likely 5%; low 2% (the hurricane planning factor); high 11% (the Lahaina 2023 rate).

Who has access and functional needs (CMIST)

- **C – Communication:** people who speak English less than well (they may need interpreters and translated messages), and people with hearing or vision difficulty.
- **M – Medical:** people who use power-dependent medical equipment (an estimate from HHS emPOWER).
- **I – Independence:** people with a disability, people with cognitive difficulty (memory, decisions) and people age 65 and older.
- **S – Safety and support:** people age 65 and older living alone, children and people living in group quarters (in the needs table).
- **T – Transportation:** people in households without a car.

County total vs. one community

The county total counts the 25% of Census areas in the county with the highest FEMA risk score for this hazard as hit at the same time, so it is an upper bound. Use the "Largest single community" table to plan for an event that hits one community.

Map

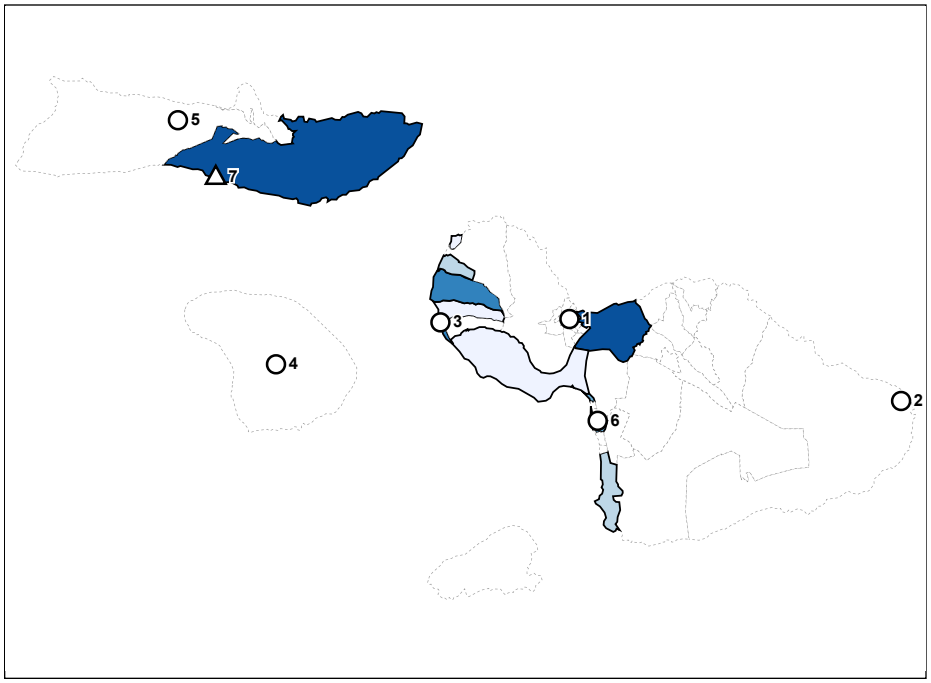

Darker blue means more people with needs, from "Lowest need" to "Highest need". A solid outline marks a Census area in the risk area; a dashed outline is outside it. Symbols: ○ usable site, △ check flood zone, ◇ flood risk not mapped, ⊠ not for this hazard. Numbers on the map match the site key.

Why population numbers can differ

People in the risk area come from ACS 2018–2022 estimates (through the CDC Social Vulnerability Index 2022). Community names use 2020 Census counts. County totals in the plan use Census estimates for 2025. Each table names its source underneath.

Every number is a planning estimate. In an event, follow county announcements.

Kalawao County (Kalaupapa, Moloka‘i) is planned with Maui County.

Who else to plan for

- **Domestic-violence survivors:** Served through confidential providers; no counts by design.
- **Off-grid households:** No public Census-area data; county and health partners to supply.
- **People on dialysis or receiving home care:** No public Census-area data; county and health partners to supply.
- **Earthquake:** Not modeled; listed as a limitation in the plan.
- **Caregivers and personal care attendants:** Stay with the person they support; count them for cots, meals and space.
- **Behavioral health:** Mental-health staff at each shelter (ratio: section 8).
- **Ni‘ihau:** Privately owned island, no public shelter; plan with the landowner and Kaua‘i County.
- **Families afraid to seek shelter (including immigrant families):** The county publishes who may use shelters; trusted community messengers share it.

6. Decision points

Proposed – supports, does not replace, county plans.

When	Trigger	Action	Owner (proposed)	Support
BEFORE	Annual pre-positioning review (no official product) County (sets the date)	Mark coastal shelters in V/A zones for site check; choose inland alternates.	County Emergency Management (each county)	Hawai‘i Department of Education (DOE) – schools, Hawai‘i Department of Human Services (DHS)
BEFORE	Coastal Flood Warning NOAA NWS Honolulu	Alert priority coastal tracts; confirm inland shelters and transport.	County Emergency Management (each county)	Hawai‘i Department of Transportation (DOT), Hawai‘i Department of Human Services (DHS)
BEFORE	Before each season: who may use shelters (no official product) County (sets the date)	County confirms and publishes who may use shelters and what ID is needed; trusted community messengers share it.	County Emergency Management (each county)	Hawai‘i Department of Human Services (DHS), Faith-based organizations, Office of Hawaiian Affairs (OHA), Hawai‘i VOAD (Voluntary Organizations Active in Disaster)
DURING	Coastal Flood Warning in effect NOAA NWS Honolulu	Use inland sites only; close sites in flood zones; move residents who need transport before high tide.	County Emergency Management (each county)	American Red Cross, Hawai‘i Department of Human Services (DHS), Hawai‘i Department of Transportation (DOT)
AFTER	Warning cancelled or all clear County / NWS / PTWC	Recovery sheltering and feeding for displaced households.	American Red Cross	Hawai‘i VOAD (Voluntary Organizations Active in Disaster), The Salvation Army

- **Coverage:** 436 of 436 Census areas have needs data (FEMA risk data joined for 435 of 436). Source: coverage check of the needs layer (CDC SVI 2022, FEMA NRI v1.20).
- **Backtest – Lahaina wildfire (2023-08-11):** observed 1,418 people in shelters; model 254 / 635 / 1,423 (low / likely / high). This is a calibration event, not validation: the high rate was set from it. Source: Lahaina 2023 backtest (Maui Now count of people in shelters).
- **Time:** a full rebuild from local data (11 steps, 20 scenarios, 20 playbooks) took 67.9 seconds on Apple M4 (2026-10-28). Team-assumed baseline without this tool: 2 working days per county per event. Sources: timed full rebuild from local data; Team assumption, to be confirmed with DHS in a timed tabletop exercise.
